

Mission

We help protect what matters most — people and property. Our mesh radio technology is designed for multiple monitoring applications and network expansion.

Vision

We will continue to advance our communication platform, innovating new products and services to meet the rising demand for enhanced security solutions across current and new end markets.

Values

Customer Mindset — We listen to the voice of the customer and welcome feedback.

Accountability — We take ownership to resolve issues and achieve common goals.

Passion — We love what we do and it drives the work we do every day.

Quality — We ensure our products and services adhere to AES Best Practices and meet the highest industry standards.

Teamwork — We collaborate on asking the right questions, leveraging our collective knowledge and expertise.

Innovation — We build on our foundation of mesh radio technology to release upgrades and engineer new products that make a difference.

Communication — We promote engagement through content and person-to-person interaction with customers, employees, and vendors.
